

## MORNING APPEAL.

Tuesday, August 7, 1888.

**FOR PRESIDENT,  
BENJAMIN HARRISON  
OF INDIANA.**

**FOR VICE PRESIDENT,  
LIVI P. MORTON  
OF NEW YORK.**

### A FOOLISH "MINER."

A man signing himself "miner" writes as follows to the Silver State:

As the item of labor in the total cost of the production of bullion in this State, does not as a rule, exceed 30 per cent., there is 70 per cent. to be charged to tools, machinery, and to mining and milling supplies.

Beginning with a pick and shovel, and figuring through the long list of tools, machines and supplies till we have a modern quartz mill, such as now used in the production of bullion, it is safe to say that under high taxation these tools machines and supplies cost miners and mill men at least double what they should cost.

As the lowest price reached by silver was not quite equal to 30 per cent. discount is not so bad by five per cent., as the present exorbitant tax upon our wants.

The Mills bill will give us a relief of 5 per cent., while free trade would give us 35 per cent.

### MINER.

It is quite clear that the man who wrote that is not a miner but a man who employs miners. The Mills bill would throw thousands of men out of employment on the Coast and they would swarm into the West looking for employment.

In a short time the labor market would be so over-stocked here that the men who now get \$4 a day in our own mines could no longer command such wages, the Miners' Union would be crushed out by the competition and men would be diving in the earth at a dollar a day as they are already in the free trade countries.

But the mine would be hoisted with his own petard, and the gold bugs would be prosperous with the advance of their pet metal in the hard times and high rates of interest, big discounts and a rising gold market would bring a corresponding depreciation of silver that would close down the silver mines of Nevada.

The Mills bill would indeed work havoc in Nevada.

### STEWART'S WORK.

The Grass Valley Tidings says, We spoke, a few days ago, about Senator Stewart having the Sundry Civil Appropriation Bill amended in the Senate so as to prevent miners from being annoyed every time one of them cut a stick of scrub timber on the public land.

Senator Stewart has had that same bill amended again in the Senate. This new amendment appropriates three hundred and forty thousand dollars for the survey of the Rocky mountain and Pacific Coast regions to ascertain what lands might be irrigated and where reservoirs should be built and where canals and ditches should be run to redeem the half desert in those parts of the country.

The Sundry Civil bill with this amendment has gone back to the House, and Senator Stewart is urging upon the members of the House Committee on Appropriations the necessity of the immediate beginning of this work.

He is of the opinion that the House conferees will agree to this amendment and permit this great work to be begun.

This action of Senator Stewart is but the beginning of the magnificent system of storing water and irrigating that will prevail in the not far future.

The surveys will show where the storage dams can be built, and then there will be no doubt about land owners below the dam sights seeing the necessity of water storage.

The Tidings is about the only paper in California that has advocated this general system of water

storage, but this paper and the journals of Nevada State have backed the indefatigable Nevada Senator to some purpose.

### NEW TODAY.
